This amusing and profound book of questions is the perfect gift for yourself or anybody else who matters to you.

Do you get bored by people who only ever ask themselves things they already know the answers to? Have you been waiting ages for someone to finally ask you the revelatory questions that make you realise what you're truly made of, deep down? That reveal to you your hidden desires and self-delusions? That make you understand why nobody thinks about you the way you think about yourself? In these 666 questions, Sven Michaelsen sends readers on a journey of self-discovery through the brain, heart and belly that's as instructive as it is hilarious. By the end of it, you'll be seeing yourself and your life with fresh eyes.
